BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT

Design of new single story clinic to accommodate an Urgent Care Center and a Physician Family Practice. The two services were separated in the design, but the space planning allowed for shared spaces to prevent functional duplication. The building was primarily a pre-engineered metal building with areas of conventional steel framing all clad with a stone and EIFS veneer.

10,290 Sq. Ft. * \$1,295,000 *
