BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT

While with a previous firm, Matt King contributed to the architectural design of the Silver Legacy Casino, Reno's tallest and most iconic resort at the time of its completion. The 38-story hotel-casino was built in the mid-1990s to revitalize downtown Reno and compete with the grand resorts of Las Vegas. Inspired by Victorian and 19th-century themes, the design features a dramatic dome centerpiece and ornate classical detailing that made the building a standout addition to the city skyline. The project balanced historical charm with the scale of modern entertainment architecture.

Unknown Sq. Ft. Cost: \$230,000,000
