**BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT**

MINKO Design was asked to prepare a master plan for the Church of St. Mary of Tulsa, OK. The Catholic Church is one of the largest in the Diocese of Tulsa, but lacked the space to foster growth and meet the demands of the church's mission. We met with all departments to determine the needs. We found the need for a large community center for large church events, a shortage of meeting space, educational space, youth space, administrative space, outreach services, storage and no dedicated space for the large choir. We were then able to develop a program that illustrated the additional square footage to meet the demands. This information was then used to develop the overall master plan and subsequent rendering of the proposed expansion. Sq. Ft.: Renovation 16,275 - Sq. Ft, New Construction 14,741
