BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT

Design and construction of a new multi-purpose activity center for the Union School District. As the Union School District expanded, there was a great demand for space to serve all of the school sponsored organizations. The main component of the facility is the 5,600 seat arena that was designed to facilitate athletic events, conferences, banquets, theater, band, cheer and concerts. The building also contains dance studios, locker rooms and a wellness center that serves the students and the Union School District community. Back of house spaces were designed to host large sporting events, travelling theater groups and concerts with capabilities for televised broadcast.

150,000Sq. Ft. * \$21,800,000 * Role: Architectural, Interiors, Structural, Civil, Landscape and MEP.

*Work completed while employed by SPARKS
